Recommendation for Zhengwen Ni

To Whom it may concern,

My name is Chris Bridge and I work as the eMobility Data Insights and Analytics Product Manager at Shell. My team of 12 people is building and managing a data platform and analytics solutions for electric vehicle (EV) charging infrastructure globally and offering reporting to over 900 internal users.

Zhengwen Ni has worked at Shell as an intern since July 2022 and as part of my team since August. During this time Zheng has worked as a data engineer on a variety of data analytics and investigation projects revolving around 'OCP' telemetry data we receive from chargers to better understand their behavior, detect issues customers may be facing when trying to use them or faults that may occur.

Zheng's prior knowledge and experience of working with a large Chargepoint operator in China was extremely beneficial and meant he was able to understand the data, use cases and tasks quickly. His passion and understanding for the domain of eMobility has also been demonstrated on a number of occasions. During his time in the team, he has completed many key pieces of analysis and written SQL/Python code that we have used in multiple proof of concept projects.

He has also shown great initiative in a number of areas to investigate deeper into the data, use modelling/statistical techniques and present his findings and insights back to the team regularly.

In the workplace Zheng has been professional, attending the office in person when required and arriving to meetings and calls promptly. We have also seen a great improvement in his verbal communication skills during his time in the team as English is not his first language and trust this will only continue to improve in the future.

I volunteered to write this recommendation for Zheng because I am grateful for his contributions to our team and am confident he will add value to other teams in his next placement or future job.

Please feel free to contact me if you have any specific questions regarding this reference letter.

Sincerely,

Chris Bridge

eMobility Data Insights and Analytics Product Manager
